

## Restful Legs

Hylands's Inc., Los Angeles, CA, has unveiled Restful Legs to provide relief to many who suffer from leg jerks, twitches, crawling, itching, tingling leg sensations and the constant urge to move the legs. Hyland's Restful Legs quick-dissolving tablets calm the urge to move legs and provide relief from restless sensations that can often be debilitating. The all-natural tablets contain safe and effective medicines that trigger the body's defenses to repair itself from agitated leg symptoms—faster than the body is able to do on its own. Because agitated legs may be a symptom of a condition requiring professional medical care, Hyland's believes that consumers should first consider whether they should see their healthcare professional.
